THE AMERICAN BAR IGNORES IT

Families and individuals have been devastated along with their estates due to the corruption in the Probate courts and conservator/guardian cases. This is due to unethical lawyers and corrupt judges that are allowed to operate probate courts as a Cash Cow system. These so-called legal professionals are protected by law enforcement to prey on the consumers of the probate courts.

CHANGE.ORG PETITION

Solid reforms are needed to protect other families that will come to the probate courts in the future. These remedies include but are not limited to :

- 1.) criminal prosecutions of corrupt judges and lawyers that have committed crimes including elder abuse in the courts.
- 2.) Provided specialized funding to probate courts for legal services and education
- 3.) Allow jury trials in probate court
- 4.) Make probate court investigators mandated reports of elder abuse and criminal activity in probate cases.
